

Satellogic Expands Partnership with IDT and U.S. Office of Naval Research for "Slingshot" Program Phases II and III

March 24, 2026

NEW YORK, March 24, 2026 (GLOBE NEWSWIRE) -- **Satellogic, Inc. (NASDAQ: SATL)**, a vertically integrated geospatial company delivering high-resolution Earth Observation (EO) at unprecedented scale and economics, today announced a new subcontract agreement with Innovative Defense Technologies (IDT) to support the U.S. Office of Naval Research (ONR). This agreement extends the ongoing Slingshot program, an R&D initiative alongside commercial partner GRVY, focused on accelerated maritime intelligence and low-latency orbital processing.

Following the success of Slingshot I, the new phases represent a significant expansion of the program's scale and technical sophistication:

- **Slingshot II (Summer 2026):** Provides a temporal extension of service for two Inter-Satellite Link (ISL)-equipped NewSat Mark V satellites.
- **Slingshot III (2027):** Adds six next-generation **NewSat Mark VI** satellites to the constellation, bringing the total dedicated fleet to eight ISL-ready assets.

Redefining Speed for National Security

The Slingshot program is designed to solve one of the most pressing challenges in orbital reconnaissance: latency. Traditionally, the time between capturing an image and receiving an actionable alert on the ground can take hours.

By utilizing Satellogic's ISL-capable satellites and edge computing payloads, the ONR can perform real-time image processing, object classification, and tracking of interests directly in orbit. This significantly reduces the data-to-decision timeline, providing the Navy, Marine Corps, and other US Agencies with critical advantages in maritime domain awareness.

"The Slingshot program is a testament to how commercial satellite innovation can meet the rigorous demands of national security," said Luciano Giesso, VP of Space Systems. "By integrating our next-generation Mark VI satellites, we are delivering unique optical EO capabilities that drastically improve ground segment latency, a feat that remains rare in our industry."

About Satellogic

Founded in 2010 by Emiliano Kargieman and Gerardo Richarte, Satellogic (NASDAQ: SATL) is the first vertically integrated geospatial company, driving real outcomes with planetary-scale insights. Satellogic is building a scalable, fully automated EO platform with the ability, when scaled, to remap the entire planet with an optimal balance of frequency and resolution at unprecedented unit economics, providing accessible and affordable solutions for our customers.

Satellogic's mission is to democratize access to geospatial data through its information platform of high-resolution images to help solve the world's most pressing problems including climate change, energy supply, and food security. Using its patented Earth imaging technology, Satellogic unlocks the power of EO to deliver high-quality, planetary insights at unparalleled value.

With more than a decade of experience in space, Satellogic has proven technology and a strong track record of delivering satellites to orbit and high-resolution data to customers at the right price point. To learn more, please visit: <http://www.satellogic.com>

Forward-Looking Statements

This press release contains "forward-looking statements" within the meaning of the U.S. federal securities laws. The words "anticipate", "believe", "continue", "could", "estimate", "expect", "intends", "may", "might", "plan", "possible", "potential", "predict", "project", "should", "would" and similar expressions may identify forward-looking statements, but the absence of these words does not mean that a statement is not forward-looking. These forward-looking statements are based on Satellogic's current expectations and beliefs concerning future developments and their potential effects on Satellogic. Forward-looking statements are predictions, projections and other statements about future events that are based on current expectations and assumptions and, as a result, are subject to risks and uncertainties. These statements are based on various assumptions, whether or not identified in this press release. These forward-looking statements are provided for illustrative purposes only and are not intended to serve, and must not be relied on by an investor as, a guarantee, an assurance, a prediction or a definitive statement of fact or probability. Actual events and circumstances are difficult or impossible to predict and will differ from assumptions. Many actual events and circumstances are beyond the control of Satellogic. Many factors could cause actual future events to differ materially from the forward-looking statements in this press release, including but not limited to: (i) our ability to generate revenue as expected, including due to challenges created by macroeconomic concerns, geopolitical uncertainty (e.g., trade relationships), financial market fluctuations and related factors, (ii) our ability to effectively market and sell our EO services and to convert our pipeline of potential contracts into actual revenues, (iii) market acceptance of our EO services and our dependence upon our ability to keep pace with the latest technological advances, including those related to artificial intelligence and machine learning, (iv) risks related to the secured convertible notes, (v) the potential loss of one or more of our largest customers, (vi) the considerable time and expense related to our sales efforts and the length and unpredictability of our sales cycle, (vii) risks and uncertainties associated with defense-related contracts, (viii) risks related to our pricing structure, (ix) our ability to scale production of our satellites as planned, (x) unforeseen risks, challenges and uncertainties related to our expansion into new business lines, (xi) our dependence on third parties, including SpaceX, to transport and launch our satellites into space, (xii) our reliance on

third-party vendors and manufacturers to build and provide certain satellite components, products, or services and the inability of these vendors and manufacturers to meet our needs, (xiii) our dependence on ground station and cloud-based computing infrastructure operated by third parties for value-added services, and any errors, disruption, performance problems, or failure in their or our operational infrastructure, (xiv) risks related to certain minimum service requirements in our customer contracts, (xv) our ability to identify suitable acquisition candidates or consummate acquisitions on acceptable terms, or our ability to successfully integrate acquisitions, (xvi) competition for EO services, (xvii) risks related to changes in tax laws and regulations, including the "One Big Beautiful Bill Act," (xviii) risks related to changes in trade policy and the related impact on macroeconomic conditions, including further expansions of U.S. export controls and tariffs, as well as related retaliatory actions, (xix) challenges with international operations or unexpected changes to the regulatory environment in certain markets, (xx) unknown defects or errors in our products, (xxi) risks related to the capital-intensive nature of our business and our ability to raise adequate capital to finance our business strategies, (xxii) uncertainties beyond our control related to the production, launch, commissioning, and/or operation of our satellites and related ground systems, software and analytic technologies, (xxiii) the failure of the market for EO services to achieve the growth potential we expect, (xxiv) risks related to our satellites and related equipment becoming impaired, (xxv) risks related to the failure of our satellites to operate as intended, (xxvi) production and launch delays, launch failures, and damage or destruction to our satellites during launch, (xxvii) the impact of natural disasters, unusual or prolonged unfavorable weather conditions, epidemic outbreaks, terrorist acts and geopolitical events (including the new conflicts in Iran and the Middle East) on our business and satellite launch schedules, (xxviii) risks related to our ability to protect our intellectual property critical to the design and function of our satellites and our EO services, and (xxix) the anticipated benefits of our domestication may not materialize. The foregoing list of factors is not exhaustive. You should carefully consider the foregoing factors and the other risks and uncertainties described in the "Risk Factors" section of Satellogic's Annual Report on Form 10-K and other documents filed or to be filed by Satellogic from time to time with the Securities and Exchange Commission. These filings identify and address other important risks and uncertainties that could cause actual events and results to differ materially from those contained in the forward-looking statements. Forward-looking statements speak only as of the date they are made. Readers are cautioned not to put undue reliance on forward-looking statements, and Satellogic assumes no obligation and does not intend to update or revise these forward-looking statements, whether as a result of new information, future events, or otherwise. Satellogic can give no assurance that it will achieve its expectations.
